

TELECOM CUSTOMER COMPLAINT - FORMAL REPORT

Date: 08 June 2026

Customer: Priya Nair Mobile: 98450-22099

Service Area: Whitefield, Bengaluru

Subject: Persistently slow internet for several days

To the Network Operations Team,

I am writing to report severely degraded mobile data speeds in the Whitefield area of Bengaluru over the past three days. Web pages take very long to load and video calls freeze constantly, making it impossible to work from home reliably.

Many residents near the Whitefield tech park report the same slow speeds, especially during peak evening hours. The signal shows full bars but throughput is extremely poor, which points to congestion or a degraded tower in the area.

Please investigate the Whitefield tower capacity and restore normal data performance as soon as possible.

Issue type: slow internet

Severity: high

Location: Whitefield, Bengaluru

Regards,
Priya Nair
